

WisdomForce Unveils Full Potential of High performance real-time change data capture with its new product DatabaseSync

WisdomForce Database Sync System arrives and delivers high-performance real-time transactional change data capture, log-based database replication and data warehouse feed from very large databases.

Seattle, WA – August 01, 2007 - WisdomForce™ Technologies, Inc., a leading provider of high-performance data movement and integration solutions, today announced general availability of WisdomForce Database Sync, a comprehensive transactional data movement solution, which is designed to meet the needs of enterprise-wide, mission-critical systems that use multi-vendor enterprise databases in heterogeneous environment.

WisdomForce DatabaseSync is scalable and user-friendly software that in combination with WisdomForce FastReader provides with full data movement solution that enables high data quality and immediate access to most recent business data.

- DatabaseSync allows users to share information across different systems in heterogeneous environment by replicating data between different hardware platforms and data sources without losing the transactional integrity of the data.
- DatabaseSync provides continuous and selective capture of immediately changed transactional data in heterogeneous database, operating system and hardware environment. It eliminates the batch window and delivers and loads the real-time information into operational data store or data warehouse.
- DatabaseSync enables distributing, migrating and synchronizing data in heterogeneous distributed enterprise environment in a non-intrusive way transparent to RDBMS systems and business applications.
- DatabaseSync has very low system overhead and can handle the transaction volumes required without compromising the performance of the source database.

About WisdomForce

WisdomForce solutions make enterprise data universally and securely up to date accessible and useful. WisdomForce Technologies delivers software products that help CIOs of data-intensive businesses and governmental entities to improve the quality, availability and continuity of the data within their IT systems, leading to better business decision-making, increased productivity, and an improved bottom line. WisdomForce's high-performance products focused on the real-time database data movement and data integration market.

WisdomForce is providing customers with software infrastructure for data replication, extract, change data capture, transformation, movement and management of data from one/ many database to one/many database.

WisdomForce's customers include Wal-Mart, Coca Cola, Verizon, Motorola, US Department of Labor, Thomson Financial, Verisign and Ross Stores among others.

WisdomForce's leadership in the market is based on customer adoption, innovation, vision and product superiority in real-world customer situations. WisdomForce is based in Seattle, Washington. For more information, please visit <http://www.wisdomforce.com> .
