**NEWS RELEASE**

## **WisdomForce Unveils Full Potential of Data Movement and Data Integration with FastReader 2.0**

*The industry's first solution for high-performance moving critical data between databases in heterogeneous environment*

**Seattle, WA – October 10, 2004** - WisdomForce™ Technologies, Inc., a leading provider of data movement and integration solutions, today announced the availability of FastReader™ 2.0, a comprehensive solution for automating and managing the data move between large, multi-vendor enterprise databases. FastReader™ is the first solution in the market that provides customers with the ability to quickly, intelligently and automatically perform Oracle data unload into portable text flat files and generate loaders for multi-vendor databases such as Oracle, DB2, SQL Server, MySQL and others. Through its unique technology, FastReader™ automatically move data and giving companies the ability to reduce significantly the batch window when migrate data from Oracle to Oracle, DB2, MS SQL Server or MySQL.

***New features include:***

- **Enterprise Scalability and Performance.** Scales to support the largest enterprise database environments with unloads data faster and more efficiently.
- **Powerful Data Migration Management.** Ability to perform selective unload on table/partition/column and row basis, binary data support, ability to split large output flat files into manageable chunks, expanded support for more data types, character sets and byte order. Ability to perform destination database data validation, enable/disable constraints from FastReader single graphic console.
- **Enhanced Ease of Use.** Streamline the management of moving data by significantly improving user interface.

### **About WisdomForce**

WisdomForce Technologies is an infrastructure and solutions software provider founded by industry veterans with a clear vision of the real-time database data movement and integration. WisdomForce is offering solutions for real-time moving data across heterogeneous systems. WisdomForce is providing customers with software infrastructure for data replication, movement and management of data from one/ many database to one/many database. WisdomForce's leadership in the market is based on customer adoption, innovation, vision and product superiority in

real-world customer situations. WisdomForce is based in Seattle, Washington. For more information, please visit <http://www.wisdomforce.com> .
