NEWS RELEASE

WisdomForce Announces Extended Support for AMD® Processor–Based Platform

FastReader offer superior performance for customers using AMD processor on Solaris, Windows or Linux platforms, enhancing even more product's position as comprehensive single solution for high-speed data transfer, backup, archiving and migration

Seattle, WA – December 6, 2005 - WisdomForce™ Technologies, Inc., a leading provider of database data transfer and data integration solutions, today announced the availability of the latest release of FastReader™ for the AMD® processor–based platforms running Solaris, Windows and Linux. WisdomForce™ Technologies, Inc. has added support of the Solaris OS on x64-based servers powered by AMD™ processors in response to customer demand. The availability of WisdomForce products on Sun's entire Solaris product line in addition to existing support of Windows and Linux on AMD will allow customers to retain the robustness of Solaris on lower-cost platforms while utilizing their existing skills in Solaris and WisdomForce software so reducing our total cost of ownership

“The needs of customers must always come first and our company is taking another step to prove that. As Sun delivers Solaris 10 across multiple platforms, WisdomForce will be a key enabler for our joint customers to deploy it as part of a data management and integration strategy that drives efficiencies and productivity and helps reduce the total cost of ownership for information technology and business operations” said Alex Corn, Director of Product Management.

Today when Solaris support on x86 was added, the WisdomForce's support for AMD now includes both 32-Bit and 64bit Windows, Solaris and Linux. Supported AMD processors are: AthlonT 64, AthlonT MP, AthlonT XP, DuronT, SempronT, OpteronT, AthlonT 64-FX, Dual-Core AMD OpteronT and AMD AthlonT 64 X2 Dual-Core. The AMD® processor–based platform provide users with high-performing, cost-effective solutions for data-warehousing, data backups and data-archiving applications.”

About WisdomForce FastReader

The WisdomForce™ FastReader™ is a popular high-performance data transfer and migration solution in every day and night critical IT operations. FastReader can transfer, migrate and integrate data from all or selected Oracle tables of any size (terabytes of data) into portable flat text files (or into pipe) in a fraction of the time without compromising the performance production database systems. The user is able to easily configure the output data format which can be

csv, xml, etc. Extracted data is in portable ASCII format and can be transferred or migrated to any datasource without additional efforts. FastReader automatically prepares input for high-speed loaders such as Oracle SQL*Loader, bcp, etc. and dynamically generates schema definition scripts and creation scripts for Oracle external tables. FastReader™ works on major databases, including Oracle, DB2, MSSQL, MySQL, Sybase. FastReader supports most operating systems and platforms: Sun Solaris, HPUX, AIX, Tru64, Windows, Linux/386, IA64. The data unload / load process with FastReader can significantly reduce storage needs and network overhead when used built-in fast compression on the fly.

About WisdomForce

WisdomForce Technologies is an infrastructure and solutions software provider founded by industry veterans with a clear vision of the real-time database data movement and integration. WisdomForce is offering solutions for real-time moving data across heterogeneous systems. WisdomForce is providing customers with software infrastructure for data replication, movement and management of data from one/ many database to one/many database. WisdomForce's leadership in the market is based on customer adoption, innovation, vision and product superiority in real-world customer situations. WisdomForce is based in Seattle, Washington.
