

WisdomForce Announces Availability of FastReader Version 4

Version 4 extends abilities of customers to transfer Oracle data into other portable formats such as EBCDIC and COMP-3 with ultra-high performance that will improve the overall business process

Seattle, WA – April 2, 2007 - WisdomForce™ Technologies, Inc., a leading provider of high-performance data movement and integration solutions, today announced general availability of FastReader™ 4, a comprehensive solution for automating and managing the high-speed database data transfer between large, multi-vendor enterprise databases in heterogeneous environment. The new software offers really unique feature required by many enterprise customers and making data transfer with FastReader very efficient.

New main features include:

- **Direct Output into EBCDIC.** In Version 4.0 customers will be able to extract the data directly into EBCDIC format while leveraging direct data unload. This is required by user needed the output in the IBM EBCDIC format and plain ASCII text is expected
- **Convert Oracle numbers directly into the packed decimal comp3 format.** This widely used to read the output file with COBOL or other language that has built-in COMP3 support
- **Convert data in CLOBs from UTF16 into UTF8.** This widely used when default NLS character set is one of the UTF16 variants
- **Performance improvements.** FastReader now extracts the data into portable format with the speed of 15 Gigabytes per minute
- **Significant enhancements of FastReader Manager (GUI).**

About WisdomForce FastReader

The WisdomForce™ FastReader™ is a next generation high-performance data transfer and migration solution in every day and night critical IT operations. FastReader can transfer, migrate and integrate data from all or selected Oracle tables of any size (terabytes of data) into portable flat text files (or into pipe) in a fraction of the time without compromising the performance production database systems. Extracted data is in portable ASCII format and can be transferred or migrated to any datasource without additional efforts. FastReader™ works on major databases, including Oracle, DB2, MSSQL, MySQL, Sybase, Netezza and supports most operating systems and platforms such as Solaris, HPUX, AIX, Tru64, Windows and Linux. The high-speed data unload / load process using FastReader can significantly reduce storage needs and network overhead.

About WisdomForce

WisdomForce solutions make enterprise data universally and securely up to date accessible and useful. WisdomForce Technologies delivers software products that help CIOs of data-intensive businesses and governmental entities to improve the quality, availability and continuity of the data within their IT systems, leading to better business decision-making, increased productivity, and an improved bottom line. WisdomForce's high-performance products focused on the real-time database data movement and data integration market.

WisdomForce is providing customers with software infrastructure for data replication, extract, change data capture, transformation, movement and management of data from one/ many database to one/many database.

WisdomForce's customers include Wal-Mart, Coca Cola, Verizon, Motorola, US Department of Labor, Thomson Financial, Verisign and Ross Stores among others. WisdomForce's leadership in the market is based on customer adoption, innovation, vision and product superiority in real-world customer situations. WisdomForce is based in Seattle, Washington.
